# [ SMART DESIGN ] [ SMART STORAGE ]

Store all those extras out of the way yet right at hand. Cheaper than renting storage and easy to afford now (ask your dealer about our great Rent-to-Own program). Super-adaptable to almost any use you need.

**"GOOD"** New England models are stronger and greener than most others, better than many builders' "best."

**"BETTER"** Signature comes in 14 models and 4 playhouses, built with all of the most popular features.

**"BEST"** Hudson Bay is near-custom with extras that could be must-haves for you.

**"CUSTOM"** is anything you want, extra-large sizes, special uses, garages, cottages, homes, you name it!

# ONE DAY ON A TRUCK, AND THIS BARN IS IN YOUR YARD AND READY FOR WORK.

In nothing but a primer coat, and only 8 upgrades available, Catskill barns are built for economy, strength and simplicity. Fully portable, so they're ready to get to work fast.

**WORKHORSE CONSTRUCTION. NO-NONSENSE STYLE.**

★ **CATSKILL.** ★

# PERFECT FOR

Some barns are affordable extra rooms, less expensive than rented storage. Many clear the garage of lawn tractors and yard tools or take advantage of the easy installation to claim a remote location. Still others become backyard destinations, a workshop, stable, studio, office, or even, like the Aurora on page 23, a classroom. Before you throw open those big beautiful doors, throw open your imagination to all the fun, interesting things a barn could be for you.

**SKYLINE, 14'x16'.** For an unforgettable escape – and one that takes “fishing shack” to new heights – spec it just like this Skyline with a 36” extended overhang and handsome, heavy-duty arched timber braces. Besides the good looks of the heavy duty braces, the overhang enlarges and raises the roof and provides a protected area. LP lap siding, Barn Red paint with accents in Ultra-7 Cedar stain, Black shingles, Cottage Basic doors in pine, 28”x29” wood-framed windows, corbels, large wood vents, awning, copped cedar cupola with glass panes.

## Features

### 12 BUILT TO HIGHER STANDARDS

Expertise that translates into smart methods and materials for every barn, even the smallest and simplest.

### 22 DESTINATION BACKYARD

An Aurora stars in this destination backyard, site of fabulous cooking classes and al fresco dinners.

### 28 YOU CAN DO THIS

Marco has a fun, five-sided footprint that transforms any outdoor space into something very special.

### 38 A PLACE OF THEIR OWN

Here's a way to spark young imaginations and give children the escape every little one longs for.

### 43 ARCHITECTURE INSPIRED

Six perfectly charming Hudson Bay models expand the horizons of what a barn can be.

#### BACK COVER:

**SOMERSET, 12'x16'**. SmartSide painted Barn Red, Medium Gray shingles, Craftsman Braced double doors, Craftsman Pushbar single door, 24" x36" aluminum windows and crossbar shutters.

EARTH  
FRIENDLY  
PROCESSES

# FINALLY, A SPA FOR YOUR TRACTOR

Think of a barn interior as a blank page. You can add wallboard and ceiling lights, cabinets and countertops like this owner did. All this and room for your tractor to stretch out!

Workbenches are available as an option, a good start right off the truck. Add hooks, bins and shelves for all your tools.

Lofts hold an amazing amount of gear. They come standard with some barns, and you can add or adjust the depth.

Radiant barrier roof sheathing reduces solar heat gain significantly, keeping a barn cooler and brighter.

Six foot of rust-free aluminum makes a super-strong hinge.

2"x6" fascia – a bigger size that improves the proportions

An ultra-smooth surface that is easy to sweep clean and a live load rating that's higher than plank floors.

# THREE WAYS WE PUMP UP YOUR BUILDING.

**If it's strength you're after, you'll love our six-foot piano hinge** – ours exclusively. It spreads the weight of each door along its full length so doors operate smoothly for the life of the barn. And strong-arm anyone who thinks he will “just take the hinges off.” Why worry about a hinge? Because it's a weak point in many barns. Not in ours.

**If it's a strong floor you want, look no further.** Engineered wood has amazing strength, especially LP's SmartFloor. A standard  $\frac{3}{4}$ " SmartFloor in a 10'x20' barn has a 40,000-pound live load rating. Plus world-class resistance to moisture, termites and fungus, for strength that lasts.

**Fascia should match the building.** A strong barn deserves to look strong, and that's what a fascia of the right proportion does. Ours, at 2"x6", likely matches your home. Some builders offer it at extra cost, but it is standard on Signature and Hudson Bay barns.

**INSIDER TIP:** In a floor, it's not weight you want, but strength. The live load capacity of ours is about 5 times that of a typical house (which comfortably holds grand pianos, bathtubs, and holiday dinners for big families!)

SEE PAGE 57 (BARN RAISING) FOR MORE DETAILS ABOUT THE QUALITY OF OUR BUILDINGS, TOP TO BOTTOM. WE CAN SAFELY SAY IT'S SECOND TO NONE.

# NEW EN

# GLAND

*“I’ve always admired your innovative construction. My favorite ‘fun fact’ is that these barns go up in a flash, regardless of size. The smaller ones are off-loaded from a truck, and the bigger ones are panelized – fit the floor, sides and roof together, and it’s pretty much done. The lot stays clean, and the barn itself is tighter and stronger than stick-built.”*

**HANOVER, 12'x20'.** When that extra space needs some head-room, go for the steeper pitch of a Hanover. Shown is one with SmartSide siding painted in Night Owl with Soft White trim, Medium Gray shingles, Cottage Stall doors, 30"x36" aluminum windows, Z-style shutters, wood vent, cedar flower boxes and a large cupola with sailboat weathervane.

## BUILT TO HIGHER STANDARDS

Our basic barns – the category we call “good” – are built to higher standards than many sell as their best. New England barns give you that extra space you need with authentic, down-home sensibility. Nothing fancy, nothing done halfway. Skids are pressure-treated and joists are on edge. Floors, walls and roofs use heavier lumber and are panelized for strength and a true, tight fit. SmartSiding or vinyl, SmartFloors, keyed latches and six-foot piano hinges make for barns that are built to last.

## SILVER LINING

Tucked garden-side, this Hartford makes the most of its storage capabilities by bringing tools right where they are needed most.

**HARTFORD, 10'x14'**. SmartSide siding painted Ocean Mist with Devon Cream and Turquoise accents, Medium Gray shingles, Pushbar door, 24"x36" aluminum window with Z-style shutters and cedar flower box, large cupola.

**DELAWARE, 8'x10'**. Go traditional shed style with a saltbox roof. Willow siding, Khaki trim and doors, Tan shingles, Craftsman Stall doors, 28"x29" wood windows and cupola.

## BIG JOHN SAYS,

*"Modern wood technology results in a barn 100% better than those built, say, 20 years ago. Be sure your builder is up to date with new methods and materials."*

Ask about a Rent-to-Own payment plan.  
Prepare your site and arrange for delivery.  
That's all there is to it!

**Top: BOSTON, 10'x12'.** This neat little barn puts a gardener's tools right at hand while de-cluttering the garage. Khaki siding, Devon Cream on the trim and Crossback doors, Weathered Wood shingles and aluminum threshold.

**Bottom: MYSTIC, 10'x10'.** Where 'simple storage solution' and 'bold good looks' come together in one structure. Barn Red siding, custom color trim and doors, Weathered Wood shingles, Craftsman Crossback doors, wood vents.

# PRACTICALITY COMES FIRST

Gambrel roofs may “just look right,” but they were originally designed to provide more interior space, and they still make sense as a simple, unfussy way to get maximum storage per footprint.

**MYSTIC, 10'x16'.** In certain circles, asking for one more inch of space will get you kicked outdoors, which is actually the very best place to reclaim some elbow room, as this handsome Mystic demonstrates. Green Stone siding with Willow trim and Sage Braced doors, 24"x36" aluminum windows and Medium Gray shingles.

*“Signature was our first collection, and it’s still our largest. There are about 15 good reasons for that. Take a look at the Standards (page 59), and you’ll see that Signature Collection barns are in the sweet spot between practicality and looks. For one thing, their deeper overhangs and beefier fascia match most houses well. The standard dimensional shingles do, too. With so many choices and options in the Signature series, these barns are worth your serious consideration.”*

# SIGNA

# TURE

## BACK 40, BUT NOT FORGOTTEN

Store more, anywhere you need it. The versatile Skyline always proves itself up to the task and represents your farm handsomely, even as a remote well house.

**SKYLINE, 8'x10'.** SmartSide in Soft White paint with Black shingles, Crossbuck door, 28"x29" wood-framed window, and medium cupola with a rooster weathervane.

## UNDER CIVILIZATION'S SPELL

It doesn't take much - just a perfectly civilized structure to claim the far edge of your property. No one needs to know your real motive - bringing order at last to all that stuff once crowding the garage.

**SKYLINE, 10'x16'.** SmartSide siding, Ocean Mist with Devon Cream and Night Owl accents, Pushbar doors, steel roof in galvanized color, strap hinges, 30"x36" aluminum windows, cedar flower boxes, large cupola.

**SKYLINE, CUSTOM, 14'x16'.**

Modified Skyline with pine siding, Smoke stain, 6'6" walls, double Arch-top doors, 12/12 roof pitch. Custom siding and shingles, large wood vent.

# THE MOST BEAUTIFUL BARN

Clad quietly in stained pine siding and sporting custom slate shingles, this barn has stood the test of time as the barn most people want. If you are going to build one barn and you want it to please the eye every time you or anyone else sees it, we can recommend this customized Skyline barn.

# SKYLINE AS YOU LIKE IT

Skyline's middle name should be "Versatile." A Skyline barn is pretty terrific by itself, with its classic gable roof, but you can add whatever you want - a cupola, a row of windows, a larger door - or even change the roof pitch.

## REMOTE LOCATION SPECIALISTS

Once a foundation is in place, it typically takes less than a day to install a barn. The customer reaction we hear most often? "Amazing!" That's how a Skyline like this can take advantage of a steep and wooded lakefront site.

**SKYLINE, CUSTOM, 10'x10'.** Pine cove siding with Ultra-7 Bronze stain, 8' high sides, 12/12 roof pitch, soffits on gable ends, Weathered Wood shingles, 33" and 54" Pushbar doors, 28"x29" wood-framed windows, 4' loft, continuous shingle vent (in place of end vents).

Somerset's clerestory windows

**BIG JOHN SAYS,**  
*“Look for metal truss plates reinforcing the roof truss joint. If you see scrap wood nailed there instead, you might want to think twice.”*

**SOMERSET, 10'x16'.** Craftsman-inspired windows let light stream inside, a real bonus for workshops. Bronze siding, Devon Cream and Oak Leaf accents, Weathered Wood shingles. Craftsman Stall doors, triple wood windows, crossbar shutters, and corbels.

# DESTINATION BACKYARD

A hand-built clay oven takes pride of place in Kathy and Mike Lehr's backyard, the site of intensive cooking classes and sumptuous al fresco dinners. Their Aurora barn has a workbench and stainless steel kitchen tables that let students do last minute prep or cool freshly baked loaves. A loft stores containers and extra-long utensils.

**AURORA**, 10'x16'. Pine Cove siding with Ultra-7 Smoke stain, Weathered Wood shingles, 72" fiberglass doors with 8-lights and Cherry paint on both sides, 24"x24" aluminum windows (across back wall), 28"x29" wood-framed windows, cedar flower boxes, corbels, Silvertch roof sheathing, workbench and 2' loft.

## COOK'S NIRVANA

Nationally known chef Kathy Lehr constructed the clay oven herself. She also makes wood peels needed for breads and pizzas and grows a delectable array of gourmet vegetables. While the oven can be used for almost anything, Kathy's focus is on artisanal breads of a quality few have ever tasted.

Lehr learned from Danielle Forestier, legendary baker who mentored Julia Child in breads. Forestier calls Lehr, "the best bread maker east of the Mississippi."

**TOP:** A wood fire built in the afternoon reaches 600°-700° by dinnertime, perfect for wood-fired pizza, and cools through the night to 350° for baking breakfast muffins.

**BOTTOM:** Baked in a wood-fired oven, rustic French bread develops a crust that explodes with flavor.

## DINNER WITH KATHY

The highlight of the evening is a blend of great food and friendship amid a refreshingly spontaneous entertaining style. Everything is prepared with the freshest ingredients, emphasizing authentic local sources, especially Kathy's own breads.

To inquire about cooking classes or buy a bread-baking DVD, contact Kathy at [taoofdough@neo.rr.com](mailto:taoofdough@neo.rr.com).

*"Ovens like these were used by ancient tribes across the US and Mexico. They provide conductive, convection and radiant heat all at once. Having a beautiful, fully enclosed classroom nearby is so helpful when I teach cooking classes ... and it's great for entertaining, too."*

## HOW TO GO FROM SIMPLE TO SPECTACULAR

The three 10'x12' Auroras below begin with siding in Pewter paint, Devon Cream trim and Medium Gray shingles.

This Pushbar door is standard. Every Aurora is built to the high standards of the Signature series. Available from 8'x8' to 24'x32'.

We upgraded the door style to Cottage Stall, which is 66" wide, and added a 30"x36" aluminum window with crossbar shutters. The corner boards are painted in the Devon Cream trim color.

This Aurora is dressed up with lap siding, bright Turquoise doors and Devon Cream fascia and corbels. There are now three 28"x29" wood-framed windows with 30" and 60" cedar flower boxes. A large cupola is the finishing touch.

# LIKE TWO SPACES FOR ONE

When you clear out all that et cetera in your garage, you can organize it in one of these beautiful barns. And reclaim your garage, too. It's like getting two new spaces instead of one. This is a tactic that works with your lifestyle, not against it.

*Right: **AURORA, 8'x12'**. SmartSide siding in Ocean Mist with Soft White and Lemon accents, Cottage Stall doors and a 24"x36" aluminum window.*

*Below: **AURORA, 10'x12"**. Olive vinyl siding with Almond soffit and fascia, Pumpkin doors, Medium Gray shingles, Cottage Basic doors, 30"x36" aluminum windows and weathered wood vinyl shutters. Shown in new standard materials: 5" straight vinyl siding versus 4" Dutchlap and painted wood doors versus fiberglass.*

# DOES YOUR HOUSE HAVE A GABLE ROOF? MOST DO.

Like most houses, Aurora has a gable roof. You'll also find it in Hartford, Hanover, Skyline, and three Hudson Bay models. You can match your house or choose a distinctive roof line. Your dealer can advise you about shapes, sizes, options, finishes and materials that can add value and give your barn wonderful character.

**AURORA, 14'x20'.** SmartSide siding in Desert Tan with Spun Gold and Devon Cream accents, Weathered Wood shingles, 66" double Archtop doors, 30"x36" aluminum windows, 60" cedar flower box, large wood vents, coppertop cedar cupola with louvers and copper finial.

# YOU CAN DO THIS

Think “dream” with “house,” “car,” “job,” - they could be nice ideas that are never quite real. Now and then, however, a dream comes along that is easy to put in place, like this Marco barn. With a fun, five-sided footprint and optional glass doors, this is a structure to transform any outdoor space. And it can be installed in a single day.

**CUSTOM MARCO, 12'x12'.** Exposed rafters, custom slate shingles, Smoke stain on cedar lap siding, double full-light Spanish cedar doors, double 20"x60" windows and awning.

**MARCO, 10'x10'.** SmartSide siding with Pewter stain and Sandstone trim and accents. Black shingles, 24"x36" windows, White vinyl shutters, flower boxes and pre-hung 15-light fiberglass doors.

## DO MORE WITH WHAT YOU HAVE

The five-sided chic of this lap-sided Marco with its glass doors and windows conjures breezy afternoons on coastal outcroppings. Many options let you do it your way, and any way you do it puts that neglected corner of your yard to very good use.

# SOMETIMES A BARN'S JUST GOTTA BE A BARN

These homeowners hit the ground running, pulling the largest lawn tractor out to the driveway, with a mowing deck in summers, a snow blade in winter. Ontario's 6'6" sidewalls allow for full height doors on the ends and/or sides, while Windsors accommodate end doors only.

**ONTARIO, 12'x16'**. Riverway siding, Devon Cream trim and Weathered Wood shingles. Craftsman Stall doors, 30"x36" aluminum windows, crossbar shutters and a large cupola.

**ONTARIO, 16'x28'.** Sandstone siding, Devon Cream trim and Weathered Wood shingles. Transom garage doors with decorative strap hinges.

**WINDSOR, 10'x12'.** SmartSide siding painted Barn Red with Devon Cream trim, Medium Gray shingles and Stall doors.

## FAITHFUL WITNESS TO FARM HERITAGE

What you see first is the satisfying shape of a classic gambrel roof, whether you choose a snug 8'x8' Windsor or get massive with a 24'x40' Ontario. What's always satisfying is the roominess inside.

**LOL: Lots of loftiness.** The biggest barns (24' wide) come with a full loft and pull-down stairs. 14', 16' and 20' wide barns have a 4' loft; 10' and 12' wide have a 2' loft. All Ontarios and Windsors have hefty 2"x10" top plates.

**SCIOTO, 20'x20'.** Custom color siding, Khaki trim and doors, Cedar-stained porch deck and posts, Tan shingles. Craftsman Braced doors, 30"x36" and 24"x36" aluminum windows, Z-style shutters, wood window and cupola.

## YOUR FAVORITE ROOM JUST MIGHT NOT HAVE WALLS

A porch is equal parts comfy and cool, especially when a careful use of weighty posts grounds that lovely, open-air feeling. Choose square posts or round, hand-peeled cedar posts that are only a notch or two from a tree trunk.

## ROCKING RESPITE

There's a touch of irony in the way this sizable garden shed blends work and rest. It's big enough for a garden tractor to be driven through double doors (on the far end) and a workbench below the windows. And then its porch gives its tired owner a beautiful view.

**BROOKSIDE, 10'x16'.** Soft White with Bronze stain on the porch post and deck. Craftsman Braced door, wood windows, crossbar shutters, flower boxes, galvanized steel roof.

## RIVER CALL

*A cozy retreat on the riverside marries convenience with whitewater escape.*

Perched on a steep hillside overlooking a pristine waterway (location not to be revealed) is one of the best countryside finds, part changing room, part outdoor kitchen, part boathouse.

**HORIZON, 10'x14'.** Pine cove siding, Cedar stain and Brown shingles. Craftsman Stall doors (double doors on back), wood windows, flower boxes, large wood vents, hand-peeled cedar posts.

# A SINGULAR STRUCTURE THAT BREAKS THE MOLD

It's fitting that a gardener-owner would begin with a Lexington, a typical porch barn made anything but typical with a finished deck and generous plant shelves. An awning shades double wood windows, and a stained door adds organic texture.

**LEXINGTON, 14'x16'**. SmartSide siding painted Willow with Soft White trim and accents in Ultra 7 Cedar stain, steel roof in galvanized color, 33" and 66" pine doors, 28"x29" wood-framed windows, awning over windows, two plant shelves.

## NOT YOUR ORDINARY SHED

Its modest size and classic shed roof are lifted far above ordinary with a few deft touches, beginning with Barn Red arctop doors with decorative hinges, paired wood windows and a simple but striking long window on the end.

**SPRINGFIELD, 10'x14'.** SmartSide siding painted Latte with Barn Red doors, Devon Cream trim and Pewter accents on the window frames and grills. Medium Gray shingles, Arctop door, strap hinges, 28"x29" wood-framed windows, 60"x10" aluminum window.

## BUNGALOW ECHO

This backyard 'extra room' is as comfortable and convenient as it gets. Turn it into your art or craft studio, writer's retreat or idea-inspiring reading room. Or throw open the doors and serve breakfast in a protected but nearly out-of-doors setting, rain or shine.

**HAMPTON, 10'x14'.** Green Stone siding, Devon Cream trim, Weathered Wood shingles. 30"x36" aluminum windows, 15-light double doors.

# DESERT AGENDA

Shed-roof simplicity becomes an eye-catching jewel in this spacious desert backyard. The compact, handsome structure keeps landscaping and gardening tools in close proximity and disguises the pool mechanics as well.

**ELLIOT, 8'x10'**, LP lap siding painted Still Water with Soft White accents, 54" Pushbar doors in pine with Ultra-7 cedar stain, Medium Gray shingles, 60" x10" window.

**EMMA SAYS,**

*"I love gardening"*

## HOW TO GROW

**GARDENER, 8'x10'.** A match made in gardener-heaven! Plant shelves, window boxes and translucent roofing come standard, just as a gardener might spec it. Here, it is decked out in Willow with Devon Cream trim and a Cool Blue door. Weathered Wood shingles, Craftsman Braced door and a cupola.

# A Place of their Own

Our KidzSpace playhouses are ready for a child's everyday escapes and wide-ranging interests, from boisterous adventures to royal processions of stuffed animals. All are built with child-safe glass, and most are fitted out with a child-sized loft and a discrete adult door on one side.

**An inspired child lives here.** An ornate Victorian playhouse (below) or a fancifully painted Clubhouse (right) leaves no doubt that this backyard will inspire many a beloved experience. Adorned with a porch and fancy white railings (optional for the Victorian and Castle, but how can you resist them?), these playhouses invite children to step inside and enter a world of their own.

**VICTORIAN, 8'x8'.** SmartSide painted Princess Pink with Soft White accents, Medium Gray shingles, 14"x21" windows and 3'x8' deck.

**CLUBHOUSE, 8'x12'** SmartSide painted Soft White with Kid's Orange, Turquoise and Dill Pickle. Medium Gray shingles, 14" x 21" and octagonal windows.

# SWEET NEIGHBORHOOD FOR LITTLE ONES

Almost two decades after we designed our first KidzSpace model, we proudly introduce our littlest playhouse, Storybook. It's a reminder that little is good, little is right for little ones, and the little price of Storybook is a good thing, too!

**STORYBOOK, 4'x6'.** LEFT: SmartSide painted Turquoise with Soft White accents, Medium Gray shingles. CENTER: Painted Kid's Orange with Soft White accents, Medium Gray shingles. RIGHT: Painted Coral with Soft White accents, Medium Gray shingles. 14"x21" window.

## Playing Well. TOGETHER.

New brights are making a statement on front doors everywhere, but their forte is in painting playhouses playfully, where color tells children this space is theirs, all theirs.

**CASTLE, 8'x8'.** Just imagine the princes, princesses and fire-breathing dragons bound to gather at this castle. Night Owl siding, with pine door in Ultra-7 Bronze stain and Soft White trim and shutters. Medium Gray shingles.

An aerial photograph of a large, calm lake, likely Lake Superior, with a forested shoreline in the foreground and mountains in the background. The sky is a mix of blue and white clouds. The word "HUDSO" is overlaid in large, white, sans-serif capital letters across the center of the image.

# HUDSO

# N B A Y

*“I think a barn’s small size helps explain its charm as a landscape element. It echoes the house without competing, extending your home into a homestead or settlement, whether it brings to mind a farm, a ranch or an English village. With Hudson Bay’s refined design sensitivity and semi-custom options, you can build almost anything.”*

# ARCHITECTURE INSPIRED

Set in the shelter of a towering cliff, a rugged micro-cabin is brought to life with extended eaves, exposed rafters, Spanish cedar doors and windows, and a copper-topped cupola. With all of the refinements of Hudson Bay's semi-custom detailing and luxury materials.

**ASPEN, 10'x14'** Cedar lap siding with Cedar stain, cedar shakes, Spanish Cedar doors [nine-light 36" single and paneled 60" double], 28"x29" wood windows, Coppertop cupola with louvers and Cedar stain.

## GARDEN HIDEAWAY

**DANA, 8'x10'.** Small but simply perfect, this shed-roofed Dana has 8" cedar lap siding luxuriously stained in Chestnut and Cedar. An awning and 10-light Spanish Cedar doors bring this simple form to glorious life.

## SPOT ON

**MONTREAL, 10'x16'.** A few crucial refinements give this backyard treasure a grand but comfortable feel. Cedar shakes top the roof and escape down to the gable ends and dormer. Along the side, a pair of plant shelves are used inventively to set the stage for a display of pots or flowers, while 20"x60" wood windows, long shutters and Spanish Cedar 9-light doors clearly spell "Welcome." In Spun Gold and Devon Cream.

## DIRECT FROM THE 18TH CENTURY

Time travel to an era when symmetry was fully appreciated. Where a one-point roof and 8-light door make utter sense. Where light bursts in through doors and wood windows on both sides. In pine cove siding, of course...here in Soft White...but just asking to be painted your favorite color.

Like all Hudson Bay designs, Cortland is near-custom. It comes in top quality materials and with more choices in siding, roofing and windows. Exposed rafters make a big difference in the look and feel, and hand-crafted Spanish cedar doors and windows are a treasure.

**CORTLAND, 10'x10'.** Standing seam steel roof in Gavalume. Eight-light Spanish cedar doors and two 20"x36" windows. Available in 10'x10' or 12'x12'.

## OLYMPIA RULES

Here's what perfection looks like in a compact package. Though a mere 8'x10', this Olympia has all the right detailing, including 9-light Spanish cedar doors and wood windows, both in Cedar stain. Cedar lap siding in Smoke stain, exposed rafters, a corrugated steel roof and one perfectly placed long window wrap it up with a bow.

# PICTURE PERFECT

Starring a coppertop cupola and finial, this Geneva is not a barn to be upstaged, especially when costumed like this in long shutters, cedar shakes and 9-light Spanish Cedar doors. Set within precise symmetry that has been a fan favorite for eons.

**GENEVA**, 10'x12'. Sage SmartSide siding, Khaki trim and doors, triple wood windows.

# RESORT LIFE AT HOME

## **FAMILY LIFE NOW CENTERS ON A PLAYFUL POOL HOUSE**

A trio of sliding glass doors open to splashing kids and smiling parents. “It’s like vacationing in our own backyard,” say the happy owners. The pool house has easy-care stone and stucco siding, and inside, guests and family find tile floors, a full entertainment-style kitchen, and changing rooms. This design began with a very modified Lexington, 20’x48’, with the pitch increased to accommodate a cathedral ceiling and a loft with bedrooms and en suite baths.

## BIG JOHN SAYS,

*“We can build a studio, cottage, pool house ... whatever you want. Our efficient, Earth-friendly building methods give you fast installation and more for your money. Let us help ... we can advise whether to adapt a structure or start with a custom architectural plan.”*

# SO MUCH MORE THAN FUNCTIONAL

Sure, it will accommodate a classic car or your biggest garden tractor, but it's also the epitome of effortless style with its Craftsman Stall door, triple wood windows and reverse gable dormer. This is a Skyline fitted out as a garage with five popular adaptations: (1) 8' side walls, (2) 8'x7' insulated garage door, (3) plank flooring, (4) windows and (5) a man door.

## BIG JOHN SAYS,

*“Since we build garages both custom and by adapting barn structures, ask us! We will advise which way is best and least costly for you.”*

## PARK IT YOUR WAY

Go custom with your garage for maximum flexibility in dimensions and detailing. This lets you match your house and fit out the interior to suit your needs, hobbies or interests. Bball, anyone?

**AURORA STABLE, 10'x16'.** Modified Aurora with pine cove siding in Cedar stain and Rustic Red steel roof. 6' high divider wall, 4' high kickboard, 8' wide red gate. The perimeter is reinforced for delivery without flooring. Dutch doors are available.

## FAVORITE PLACES FOR FAVORITE ANIMALS

Keeping your favorite animal friends warm, dry and safe is easy with the right shelter, like this stable that lives up to its rustic roots. This one is an adapted Aurora, but you can also convert a Hanover, Hartford or Mystic to a horse barn with a nifty red gate and a tack room.

### CLUCK, CLUCK, WHAT A FINE COOP WE HAVE!

**HENRIETTA, 6'X6'.** Newly redesigned, the Henrietta coop is an ideal home for chickens. SmartSide in Soft White paint and Medium Gray shingles.

LP SmartSide® Precision panels with cedar grain texture exteriors are engineered to last longer. SmartFinish®, a smooth interior is much more attractive than grainy, blotchy plywood.

8" PINE COVE

6" LP LAP

5" STRAIGHT VINYL

Hudson Bay offers two more sidings.

**WHAT TO LOOK FOR IN**

**LAP SIDING** Our pine cove and lap siding are better than most because they are designed with clear drip paths that channel rainwater away. This prevents wicking to the inside, which can cause rot.

**GARAGE DOORS**

FIRST FLOOR

SECOND FLOOR

**FAST ESCAPE**  
Cottages that spring up overnight

In 48 hours - or less - your new cottage can be installed anywhere you want. Panelized walls and roof are factory-made, adding precision, reducing cost and slashing on-site time. From 20'x24' to 24'x40'. See your dealer for specs.

# TODAY'S PALETTE

## STANDARD PAINTS Soft White also available

## PREMIUM PAINTS Premium paints are available on trim at no extra charge. Using one for siding costs a little more.

## STAINS Stains can be used on pine or cedar.

## SUPER BRIGHTS

- Base Paint Areas
- Trim & Accent Areas

## STANDARD PAINT SCHEME SHOWN

- A Siding
- B Corner boards
- C Door panels
- D Fascia
- E Soffit
- F Gable ends – splice and above
- G Corbels
- H Door trim
- I Trim around doors (on barn)
- J Wood vents
- K Window trim
- L Wood shutters
- M Wood flower boxes
- N Cupola
- O Awning (not shown)

Printing does not allow for absolutely accurate hue representation. See your dealer for actual samples. Barns built at your site come primed. Barns built at our factory have the option of being painted.

# FINISHING TOUCHES

Coppertop cedar cupolas with glass or louvers

Cupolas, medium or large in unfinished, treated wood

**WEATHERVANES** Weather vanes available only on cupolas. **A:** Carriage **B:** Rooster **C:** Eagle **D:** Horse **E:** Sailboat

## WINDOWS

Aluminum windows available in white or dark brown. Additional wood window sizes available in Hudson Bay.

Aluminum 24"x36" single hung with grills

Aluminum 30"x36" single hung with grills

Wood Window, 28"x29" stationary with grills

Aluminum, 24"x24" stationary with grills

## SHUTTERS

Additional louvered shutter sizes available in Hudson Bay.

**Left to right:** Wood Crossbar, Wood Z-style, Vinyl louvered

**A:** Aluminum Threshold Plates (standard with garage doors) **B:** Cedar Window Box, 24", 30", 60" **C:** Awning **D:** Corbels **E:** Drop Rods (use with wood doors) **F:** Strap Hinges (decorative and functional, replaces piano hinge)

## RADIANT BARRIER

Reduces solar heat gain significantly and installs in place of regular roof sheathing.

Reverse Gable Dormer

Portable Metal Ramps

Treated Ramps, 54" or 66" wide

# BARN RAISING

After more than 22 years of building barns, garages, playhouses, potting sheds, cabins and houses, our structures still go together like old-fashioned barn raisings, where each relies on the top skills of the company's craftsmen, renewable resources and efficient methods.

**THOUGHTFUL PREPARATION.** We begin with thoughtful designs that complement every housing style. We then carefully choose bright lumber, cleaner and straighter than in many houses.

**OUR PANELIZING PROCESS IS UNIQUE,** a word we do not use loosely. It builds straighter, stronger walls that fit together tightly.

**A BETTER WAY TO BUILD.** Panelization wastes less; creates stronger, straighter, tighter walls; and goes together quickly at the site. Overall, it's better than stick building.

**A 7-DAY CURE EVERY TIME.** The paint on a barn is best cured for 7 days before exposure to weather – which is hard to do – so most barns are not cured properly. Our new paint drying facility let us do the equivalent of a 7-day cure inside – improving the adhesion of paint.

**PANELIZING IS CLEAN AND GREEN.** It uses lumber efficiently, generates less waste and lets us build a barn on site with surprising speed and little site disturbance.

**STRONGER FLOORS.** In barns up to 12' wide, we set joists on edge, multiplying their strength and stability. It takes more lumber and time, but the advantage is huge – imagine how hard it would be to replace the beams under a barn! Do it right to begin with, we think.

## HOW TO PREPARE YOUR SITE

A 3"- 4" deep #57 limestone pad that is 24" larger than barn dimensions (12" for each side) is recommended. Customer is responsible for site preparation, building or zoning permits and any caulking.

*Inquire at your dealer for other ways to prepare a site.*

# LAST BRUSHSTROKE

Leigh Smith loves her home in Nashville, Tennessee, and her work at Louisiana Pacific Building Products (LP), where she is the Midwest Segment Marketing Manager.

**WHAT DOES LP SAY ABOUT US?** “When people in the barn world talk, they talk about you! As a barn manufacturer, you are always part of the conversation,” says Leigh. “You create inspiring designs and lead the way in panelization. That expertise translates into smart methods and materials that apply right down to the smallest, simplest barn.”

**WHAT DO PEOPLE NEED TO KNOW MOST ABOUT LP PRODUCTS?** “Our 5/50 limited warranty,” Smith says without hesitation. “Because of our proprietary SmartGuard, we can stand behind our products. For example, our panel and lap siding are treated throughout with the SmartGuard® process to resist fungal decay and termite damage. We say they are ‘tough to the core.’”

**PLEASE DESCRIBE LP AS A COMPANY.** “LP has been a pioneer for more than 40 years in construction materials that look great and stand up to the elements. Today, as a global leader in engineered wood, the company is known for its expertise in siding, flooring, trim and roof sheathing for barns, sheds and other outbuildings.”

**IS THERE A BONUS WE SHOULD KNOW ABOUT?** “There are several! LP’s SmartSide siding has SmartFinish, a good-looking smooth interior finish suitable for sheds and barns. In addition, the engineered wood technology we use helps keep structures dimensionally straight and resists cracking, splitting and warping.”

**COULD YOU SUM UP FOR US?** “It’s simple: no one else makes more products specifically manufactured for barns and sheds. From the rich, cedar-grain exterior texture to the 5/50 year limited warranty, LP really is a smart choice.”

Leigh Smith at LP Corp’s international headquarters, Nashville, Tennessee

## SMARTSIDE & THE ENVIRONMENT

1. LP SmartSide products are made from wood – a renewable, natural resource.
2. LP relies on small, fast-growing trees that can be replenished more quickly than older, larger trees.
3. LP uses SFI certified forest management systems to ensure that wood comes from well-managed forests.
4. LP uses the entire log. Wood waste is repurposed or used as fuel for the mills.
5. LP uses only low-emitting, safe resins while making SmartSide and does not add formaldehyde.

# STANDARD FEATURES

	Hudson Bay Series - page 42	Signature Series - page 16	New England Series - page 10

SmartSide siding, lap siding and vinyl siding come with SmartSide doors. Pine siding comes with a pine door.

\*Wood windows and doors under original manufacturer's warranty only.

## Standard vinyl siding features

Continuous shingle ridge vent (no end vents)

Choice of siding/trim/shutter hues (Corner trim is the same as the siding.)

White, almond or clay for soffit and fascia

Aluminum threshold plates

**SMARTGUARD®** SmartSide and SmartFloor use treated wood strand technology with advanced binders, wax and SmartGuard, a proprietary zinc borate, to resist moisture, fungal decay and termites.

**RELAX.** We've got you covered with Louisiana Pacific's 5-year, 100% labor and replacement warranty for SmartSide and a 50-year pro-rated, limited warranty on the substrate. SmartFloor has a 5-year limited warranty and that's in addition to JDM's 20-year warranty for Signature and Hudson Bay.

# WHAT'S IN YOUR BACKYARD?

This big red barn gives its family the extra space it needs for woodworking equipment and tools. It has a well-lit workbench and room to store materials for many projects at once. Isn't it time you owned a barn?

**JDM STRUCTURES**
